

PEOPLE'S COAL ASH HEARING

Let Your VOICE Be Heard!
Thursday, Sept. 2, 2010

**If the EPA won't come to the people, the people will
come to the EPA**

While seven hearings have been scheduled by the Environmental Protection Agency (EPA) to consider a classification for coal ash, **not one was scheduled in Tennessee**, the site of the disastrous TVA coal ash disaster in 2008. A coalition of environmental justice organizations – forming the Citizens' Coal Ash Hearing Committee – will host a people's hearing to help ensure that the voices of those who have been impacted by the lack of a "hazardous" classification of coal ash have a chance to testify. The hearing will provide time to collect testimony and comments that will be presented to the EPA regarding the ongoing coal combustion residuals rulemaking process.
